

Senergy Green Technologies HID Recycling Program Packing Instructions

Thank You for contacting Senergy Green Technologies for your HID Recycling Needs. In order to maintain a zero cost program for all of our customers. Senergy asks that the HID fixtures be consolidated to maximize efficiency and control freight costs. Please understand that we appreciate your cooperation in this program in order to make it a viable option for everyone to save on this process. We will provide you will Recycling Certificates and Lamp Disposal Certificates once equipment is back to our facility and disposed of properly by all local, state and federal guidelines. Thank You.

- 1. Please Remove Lamp From HID Fixture**
- 2. Please Remove Fixture Shroud/Reflector from Ballast Housing / Fixture Body**
- 3. Place HID Lamps in box/barrel/container**
- 4. Please Stack Shrouds on Pallet (3 to 4 Columns per Pallet depending on diameter)**
- 5. Please do not Stack Shrouds over 6 ft. high to avoid tip over in Transit.**
- 6. Place Ballast Housing/Fixture bodes in 4x4x4 Gaylord Box (approximate) or similar size Container. Container holds between 60-100 ballast housings depending on size.**

Senergy Green Technologies HID Recycling Program Packing Instructions

Example: If packaged correctly 150 fixtures can fit on 3 - 4 skids depending on ballast housing and shroud size.

Alternative acceptable packing we have had come in the door from our customers (below)...
